EXPERIENCE

My Shopping
Project
Github: https://github.com/Y2a0214/My-Shopping

Link: https://sitemyshopping.netlify.app/ The Project is fully build by using Angular

"My Shopping" is an e-commerce project built using Angular. It's like having your own digital store where people can browse and buy products, just like they do on Amazon or other online shops. Instead of physical items, it's like digital shopping where customers can shop.

UI Design
Vars Technosoft Ui

The "Vars Technosoft" Ul template in Figma is a clean and minimalist design that combines a modern aesthetic with user-friendly simplicity. It features a harmonious color palette, intuitive navigation, and well-organized elements. The template's thoughtful layout and typography choices make it easy for users to interact with the interface, ensuring a pleasant and efficient user experience.
